

# Threat Levels to Elephant Ranges in Kenya, Uganda, Tanzania and Mozambique (KUTM)

## THREAT LEVEL

This map shows the threat levels to elephant ranges in four African countries: Kenya, Uganda, Tanzania and Mozambique. Color, figure-to-ground contrast, and other cartographic design techniques are used to create visual hierarchy and balance. The map also shows the best-protected areas within the elephant ranges. The ranges with the highest threat level are labelled. The inset map locates the four countries within Africa.

0 187.5 375 750 Kilometers
